4 Health Information Intelligence System

Domain : Healthcare

Client : Government of Maharashtra [India]

Technology : C#.NET2.0, SQL Server 2005
Duration : From 1st Sep. 2007 - 31st Mar 2008
Description :

This is a web application made for Health Department of Z.P. This system tracks all the transactions of Medicines and Dead Stock items between District Health Office (DHO) and Primary Health Centre (PHC). There is different user's account for each PHC. All the transactions made at PHC side reflect to DHO Office. That means DHO can easily get the status of Stock items of each and every PHC on regular basis and transfer the unused or extra storage of medicines from one PHC to other in case of emergency. This system certainly avoids the misuse of Medicines at PHC or Sub Centre level. PHC can get the alert message for Reorder quantity as well as Expiry Date of medicines.
